PearlMini™

The Cornelius new Premium Water Dispenser

The PearlMini is the brand new Point of Use water dispenser from Cornelius: Compact and elegant, it can be floorstanding or tabletop mounted.

The PearlMini offers premium functionalities: chilled, ambient or sparkling* filtered water, glass or carafe dispensing, small footprint, AquaStop and anti-water pressure drops safety devices, top range hygiene standards, outstanding cooling and carbonation capacities* from a renowned supplier.

The PearlMini is available in two different colours as standard to fit into any environment: Black and white.

PearlMini stand is coming 2016

Height: 920 mm

Width: 470 mm

Depth: 470 mm

*Sparkling version only

PearlMini™

The water dispenser is now stepping into a new era: Versatility

Tabletop installation

Water dispenser that is ready to use.

As a tabletop with small foot print, the PearlMini is an ideal solution to integrate a water dispenser in areas with limited space requirements.

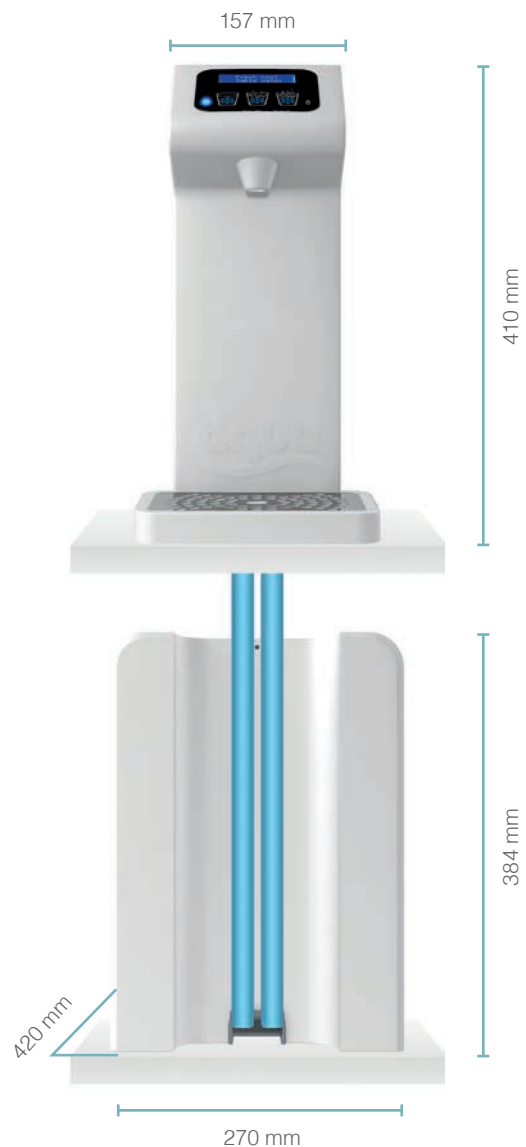

Remote installation

The PearlMini sets itself apart with its versatility.

You can separate the individual components to suit any installation types, through simple plug connections, that easily snap into place.

Mount the dispensing column on a stable surface and install the cooling unit in the cabinet underneath. You have now a space-saving water cooler solution and water is still chilled and filtered from the moment of dispense, guaranteeing a refreshing drink.

Premium Design

Your Color

Branding opportunity

Customizable

The PearlMini offers multiple customization options through specific color and branding choices. You have now the opportunity to enhance your uniqueness.

PearlMini DS™

The PearlMini DS is a brand new variation of the Pearl Mini.* It marks the entrance of Cornelius into a new segment: the water point of use dispenser low cost acquisition offering still water only.

The PearlMini DS keeps the main key features from the Pearl Mini: chilled or ambient filtered water, glass or carafe dispensing, high hygiene standards, outstanding cooling capacity, and top quality from a renowned supplier and of course the versatility.

The uniqueness of PearlMini DS comes from its simplification: the PearlMini DS is only available with still water, chilled or ambient, and features a minimalistic user friendly interface. The PearlMini DS is only available as a standard in black.

Thus, end users who want to combine quality, hygiene and design with low acquisition costs now have the perfect water dispenser.

*Available only in certain territories, please contact your local Cornelius office for more details

A photograph of a white coffee cup with a saucer and a tall glass of water on a dark wooden tray. The background is a warm, blurred interior with a window blind. The text is overlaid on the image.

»» Water and coffee. A good relationship.

Water is the number one drink choice after tea and coffee, either as a stand-alone beverage or to accompany hot beverages.

PearlMini ensures fresh consistent and quality filtered dispensed water. Even through peak demand the temperature is constantly controlled.

You now have the perfect combination to either enjoy a break or to remain focused during long meetings.

Sustainability from the mains water connection

The PearlMini is simply connected to the mains water system so it is always ready for reliable use. Unlike bottles and jug systems, the entire cost and environmentally harmful logistics of refundable containers are eliminated.

Best freshness quality

As a standard, the PearlMini offers high standards of hygiene: a touchless, bacteriostatic nozzle, pristinely clean sealed system. The Pearl Mini therefore offers the ideal barrier to contamination on the interior of the device.

Cornelius... Who we are

Global Leadership

For more than 80 years, Cornelius supplies the world's leading beverage brand owners and major retailers with solutions that combine beverage merchandising and dispensing within a complete package. We grow with our customers, helping them to maximise the success of their operations as they expand into new areas and markets.

Taking our 80 years of knowledge in understanding the beverage ingredient chemistry; applying technology to those ingredients to dispense a perfect drink: That is where the Cornelius Water history comes from...

As an innovative company we have been active in the field of Point of Use water dispensing technology for over 25 years. For this reason we assure excellent quality for both equipment and hygienic dispensed water from the tap. Our centralized water operations are located in Germany with dedicated teams focused on delivering innovation, quality and expertise to our customers.

Our Quality Standards and Uniqueness

Cornelius is certified complying with DIN EN ISO 9001. This TÜV certification underlines the continuous improvement of our Quality Management Process.

The expertise, innovation and sustainability projects of a world market leader. The technical and commercial support from local dedicated teams.

A state-of-the-art technology, modern manufacturing process such as end of line testing automatization and high hygiene standards thanks to a unique 3-step production process:

1. Using clean parts and sanitized water
2. Flushing the system with disinfection
3. Drying the system after production.

**Designed, developed
and made in Germany**
